

GAVIN LIP

Phone

+31 6 82 24 77 03

Email

lip.gavin@gmail.com

Location

Amsterdam, Netherlands

About Me

Lifelong learner with experience in computational modelling, multi-modal data integration, and transparent artificial intelligence systems for complex real-world contexts with a passion for working on interdisciplinary and open-source projects.

Skills

- Applied Computational Thinking
- Project Management & Communication
- System-Based Problem-Solving
- AI Evaluation & Interoperability
- Multi-modal Modelling
- 3 years of professional experience with PyTorch, Transformers, sci kit-learn, Matplotlib & Pandas
- 8 years of programming experience in Python, C++ & Java
- Experimental Design & Technical Writing

Links

Github

LinkedIn
<www.linkedin.com/in/gavin-lip>

Interests

- Projects involving creativity, teamwork & technology
- Bouldering, climbing & outdoor activities
- Sound design & music production
- Board Games

Publications

Computational Humanities Research, Cambridge University Press

Lip, G., de Boer, V., Bosse, A., & Grantsaan, D. (2026). *Fine-tuning large-language models for early modern Dutch translation*. *Computational Humanities Research*, 2, e3. doi:10.1017/chr.2026.10022

Open-access interdisciplinary AI/NLP publication combining LLM fine-tuning, embedding-based evaluation, and domain-expert review.

Experience

Feb 2026 - Jul 2026

AI Research Intern. Center for Neurogenomics & Cognitive Research

Clustered patient features based on pairwise correlation similarity, identifying stable and prevalent features across entire patient cohort. Learning low-dimensional multi-view representations for visualization and downstream modelling and patient stratification.

Dec 2024 - Dec 2025

AI Research Assistant. The Netherlands Royal Academy of Arts & Sciences

Developed a machine-learning pipeline for boundary detection in archival collections, integrating multiple signals to model document membership at page scan level

Framed multi-modal archival data as a structured modelling problem in collaboration with historians, supporting more accessible and computationally tractable analysis of UNESCO-listed colonial archives.

Sep 2024 - Oct 2025

Data Science Research Assistant. Network Institute

Built a data pipeline for transforming documents into validated, query-able datasets using schema-constrained extraction and structured output parsing.

Supported computational historical analysis by improving the accessibility of archival and biographical records for downstream quantitative and network-oriented research.

Dec 2023 - Jul 2024

AI Research Intern. The Netherlands Royal Academy of Arts & Sciences

Designed a reproducible framework for fine-tuning and evaluating large language models for Early Modern Dutch translation, comparing multiple model variants with preference-based and parameter-efficient methods.

Education

Sep 2024 - Jul 2026

Master of Science, Artificial Intelligence. Vrije Universiteit Amsterdam

Thesis: Multi-view Learning for High-Dimensional & Heterogeneous EEG & Phenotype Data

Coursework: Statistical Modelling & Experimental Design, Advanced Machine Learning, Neural Models of Cognition and Reinforcement Learning

Sep 2021 - Jul 2024

Bachelor of Science, Artificial Intelligence. Vrije Universiteit Amsterdam

Thesis: Fine-Tuning Large-Language Models for Early Modern Dutch Translation | Grade: 9.0/10 | Published in Computational Humanities Research Journal, Cambridge Press

Coursework: Machine Learning, Probability, Statistics, Multi-Variate Calculus and Human-Computer Interaction.
